

# Chemical traceability with The BHive® & Eurofins Sustainability Services

Manage your product's chemical compliance with advanced digital solutions from The BHive® and global testing, auditing, and training expertise from Eurofins Sustainability Services. Together we offer brands and manufacturers a seamless, one-stop solution for sustainable chemical compliance.

## Digital chemical management paired with sustainability services

The BHive® is a smart, digital chemical management platform, made for factories & brands, and accepted by ZDHC members. Advantages include

**250k+** Chemical products  
in database

**85+** Brand  
partners

**2.5k+** Factories  
enrolled

Eurofins Sustainability Services provides sustainability testing to brands, retailers, and manufacturers of consumer products - empowering them to fully understand their supply chain and where significant impacts occur.

# Managing data from input through process to output
